

**Our solutions, your test drive to space.**

**Test in outer space conditions—with your feet on solid ground.**

With more than 30 years of experience and collaboration with key players such as the European Space Agency, Weiss Technik has become a major supplier of environmental test benches for the space industry.

**Weiss Technik Thermal Vacuum Chambers** accurately reproduce outer space conditions and thus allow testing your equipment in a completely safe and controlled environment

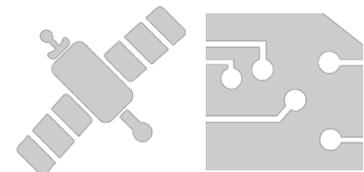

**TVC 700L (24.7ft<sup>3</sup>)**  
10<sup>-6</sup> mbar | -50°C / +100°C | 3 °C/min  
(141 kft)

Global Partner for Environmental Test Chambers

# Thermal Vacuum Chambers - TVC

## Highest specifications \*

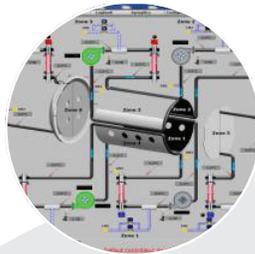

- Volume: from 100L to 50m<sup>3</sup>
- Volume level: down to 10<sup>-7</sup> mbar
- Temperature range: -185°C to +165°C
- Temperature change rate: up to 5°C/min
- Temperature homogeneity: up to ±1°C
- Temperature stability: up to ± 0,5°C

**Optimized design, reliable equipment** : from technical design to manufacturing, each step of your project is led by our team of experts located in our French plant

**Maintenance-friendly** : smart machinery implantation, integrated service interventions schedule, low maintenance components

**Worldwide service network** : you can always find a Weiss Technik expert near you

Independent thermal zones

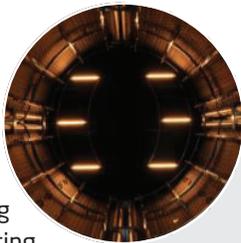

Secondary vacuum pumping system:  
turbomolecular or cryogenic pump

Cooling system:  
mechanical, liquid or  
gaseous nitrogen

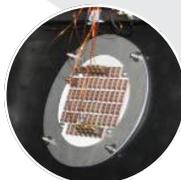

IR ageing  
and heating

Special DUT  
safety by independent  
hardware control

Specific vacuum  
feedthroughs and  
connectors

## Additional features

ISO 5 to ISO compatibility

**E/CSS** compliance

## Powerful supervision software: Spiral VS

- User-friendly, customized interface
- Data acquisition and post processing
- Manual or automatic cycles programming
- UUT control
- Remote control and alarms
- Drivers library for easy integration
