Full Feature Temperature & Humidity Chambers
For Maximum Quality Assurance

Stand the test of time.
www.weiss-na.com
Impressive Technology

The Endurance® Series from Weiss Technik: the Temperature & Humidity chamber that stands alone. Designed and engineered to give you lasting value, performance and reliability for all your testing applications. The intelligently engineered test space design allows for maximum airflow coverage and accurate gradients. Many popular sizes are available that allow you to choose the chamber that best fits your needs. The mobile design allows for greater flexibility.

Performance Features

- Energy Savings
  - Up to 30% in energy savings

- Temperature Control
  - +/- 0.5 Control over the entire +155°C to -45°C Range

- Quiet Operation
  - Ideal for laboratory testing

- Small Footprint
  - Allows for small test lab operation

- Energy Efficient
- Ability to reach 98% rh @ 95°C
- Quiet Operation
- IN STOCK for quick shipment
- Mobile Design
- Built-In Water Reservoir

- Multi-Level High/Low Temperature Protection Feature
- Anti-Condensation Feature - Keep your product protected
- -70°C to 180°C and -40°C to 180°C
- ISO9001, A2LA and UL508A Certified

- Many Additional Options Available
Smart Programming

The Latest Technology in Controllers & Software

The Latest Technology
The WEBSeason® control system is the latest technology in digital chamber control and programming. With the simple, easy to use touchscreen and menu-guided user interface, no programming knowledge is necessary. WEBSeason® offers many features including USB and Ethernet interfaces, remote control and remote monitoring, networking with other test systems, and a 32-bit control and monitoring system to ensure accurate control of temperature and humidity.

Simulation Package for Test System Integration
SIMPATI System Control Software enables full chamber control and operation via remote access. The operation of test systems becomes easy and time-saving. The integrated monitoring feature enhances the reliability of your test systems. The simple user-friendly operation and menu-guided interface does not require user training. SIMPATI offers the user the ability to control up to 99 chambers at the same time.

Humidity Diagram
Get the most out of your testing.

A Test space temperature in °C
B Relative humidity in % RH
1 Standard humidity range
2 Range with intermittent operation - (dew point +4 °C to -3 °C)
3 Extended humidity range with optional accessory compressed air dryer, dew point down to -12 °C controlled
4 Extended humidity range with additional equipment compressed air dryer (optional accessory) and capacitive humidity measuring system (optional accessory), dew point down to approx. -20 °C controlled

### Notes:
- Temperature and humidity performance data are taken at the control sensor with an empty test space.
- Exterior dimension includes touchscreen controller.
- Average temperature change rates are measured at supply air in a +25°C ambient environment.
- Additional options available - consult your local account manager.
- Heating/cooling rates are evaluated according to IEC 60068-3-5.
- This literature is for general guidance only. It does not constitute recommendations, representations or advice and nor is it part of any contract.
- Our policy is one of continuous product improvement and the right is reserved to modify the specifications contained herein without notice.
