High Performance • Advanced Technology

WW Series
Solid Construction
Walk-In / Drive-In
Test Chambers
Perfection in Performance, Equipment, and Design

The WW Series offers superior strength and durability. The smart engineered design allows you to get the most out of your testing. Welded floor with integrated perimeter sloped drains gives added testing performance. The continuously welded interior liner allows for wide temperature and humidity ranges. The one-piece construction makes for easy installation. Large chambers can be assembled from multiple sections on site.

Features

- WebSeason Precise Controller
- LEEF® Technology available
- Up to 25°C/min change rates available
- High floor loading capacity (6,000 lbs./ft²)
- Multiple plenum options for greater testing flexibility
- Ultra-bright halogen lighting system
- Custom window options available
- Engineered for prolonged soaks at high temperature & humidity (95°C/95%RH)
- Full opening bi-part entry doors
- Dual continuous gasket door seals
- Additional features available

Solutions for Many Industries

- Automotive
- Electronics
- Aerospace
- Life Sciences
- Defense
- Textiles
Even the Hardest Tests Are No Match

We know what matters for your tests: reliable, precise and reproducible results. That’s why we design our test chambers to meet exactly these demands. Weiss Technik will work with you on designing and engineering an environmental test chamber to handle even the toughest of your requirements.

Testing profiles to fit your exact testing specifications and many industry and OEM standards including: PV1200, PV2005, BMW 303.5, BMW 306.5, BMW 308.2, NES M0132 and many more

Custom Applications

Let our Application Engineers help find your solution. Weiss Technik is the global leader in custom application chambers. We will design a chamber that fits your exact testing requirements.

Reliable Controls & Software - Get the best out of your testing

Program, Control & Monitor
- From anywhere on the globe
- Access from any device
- Precise controls
- Easy Touchscreen Control
- Real time multi-user, multi-language interface

For Optimum Operation
- Up to 99 systems can be controlled
- Store measured data
- Easily manage programs for production sequences and tests
- Control test sequences

Never Miss a Moment
- View measured data and images simultaneously
- Compatible with any camera
- Data-protected documentation
- Easy installation & operation

Performances are based on laboratory conditions at +24°C, 60 Hz, with cooling water inlet temperature and flow rate according to requirements. Performances at 50 Hz may vary.

Please consult with your local Sales Representative if your conditions vary.

Temperature ramp rates are average, not linear rates of change.

¹ Heating and cooling rates between +85°C and -40°C in a temperature only empty chamber; measured at the supply air

² Humidity ranges are limited to +4.5°C (+40°F) to +85°C (+185°F) dew point, extender ranges to 5%RH are available

³ Humidity range is only applicable to WWH models

All dimensions are nominal and may not include ancillary equipment attached to chamber as required

Custom sizes available

## LEEF®

### Top Performance with Accurate Results

With LEEF Technology option inside, WW Series provides unmatched performance in your testing requirements. With the patented technology, LEEF offers features that allow for:

- Up to 40% Energy Savings
- Accurate Control of Set Point
- Precise Testing Results
- Reduced CO₂ Emissions
- LOW GWP (Global Warming Potential) – R-449A Refrigerant

**LEEF - Leading Energy Efficiency Footprint**

Learn more about all the benefits of LEEF Technology. See our Video, White Paper and Product Flyer at [www.weiss-na.com](http://www.weiss-na.com)
